Product Overview

Precision Wood Drilling Solution

This brad point drill bit is engineered for high-precision drilling in various wood types, including plywood, fibreboard, and uncoated chipboard. Featuring a specialized brad point tip and two shouldered cutting spurs, it ensures clean, accurate hole entry and efficient material removal. Designed for versatility, it is compatible with hand drills, electric portable drills, drill presses, and lathes.

Technical Specifications

Standard
DIN 7487-G

Compatible Tools

- Hand drills
- Electric portable drills
- Drill presses
- Lathes

Material	C.V. (Chrome Vanadium) Steel
Compatible Materials	Wood, Plywood, Fibreboard, Uncoated Chipboard
Size Range	3mm to 10mm
