

Brake Cable Assembly with Right-Angle Connector

This is a brake cable assembly with a right-angle connector and dual sensor probes. The cable meets UL and CE certification requirements.

Product Overview

High-Performance Brake Cable Assembly

This brake cable assembly is engineered for demanding industrial environments, featuring a highly flexible design suitable for drag chain systems. Built to rigorous safety standards, it incorporates advanced shielding to provide excellent protection against electromagnetic interference. With proven resilience against oil, flame, and extreme temperatures, this assembly ensures reliable performance in severe working conditions.

Compliance & Quality

Quality Testing

- Salt spray test
- Vibration test
- Pull-out force test

Certifications

UL, CE

Technical Specifications

Environmental Resistance

Oil Resistant • Flame Retardant • High Temperature Resistant • Low Temperature Resistant

Shielding Structure

Aluminum foil and copper wire

Application Suitability

Drag chain systems and severe working conditions

Connector Details

Connector Configuration

Right-Angle Connector
