

Brake Drum for Cars, Trucks, Buses and Trailers

These brake drums are suitable for use in a variety of vehicle applications, including US, European, and Asian cars, trucks, buses, and trailers. They are constructed from quality materials for durability and consistent braking.

Product Overview

High-Performance Brake Drums

These precision-engineered brake drums are designed to deliver reliable and consistent braking performance across a wide range of vehicle types, including cars, trucks, buses, and trailers. Manufactured from durable gray iron using advanced CNC machining, they ensure optimal fit, balance, and superior heat dissipation. Built to withstand demanding operating conditions, these components offer an extended service life for heavy-duty applications.

Technical Specifications

Material	Gray iron
Machining Method	CNC Machining

Compatibility

Compatible Vehicle Types	Cars, Trucks, Buses, Tractors, Trailers
--------------------------	---

Logistics & Production

Production Lead Times

20 days Mould Making	7 days Sample Production	20 days Batch Production
--------------------------------	------------------------------------	------------------------------------

Packaging	Pallets
-----------	---------

Commercial Terms

Key Advantages

- Excellent quality control
- Prompt delivery
- Competitive pricing
- Small orders accepted
- Customization based on drawings or samples
