

Brake Shoe 4515

This brake shoe is designed for superior stopping power and durability. It is engineered with precision for optimal fit and reliable performance in demanding braking applications.

Product Overview

High-Performance Braking Solution

The 4515 brake shoe is engineered for superior stopping power and long-term durability in demanding braking applications. Designed with precision to ensure optimal fit, this component features high-friction material for enhanced efficiency and a robust construction that extends service life. It is an ideal choice for professional fleet maintenance and heavy-duty braking requirements.

Technical Features

Key Performance Metrics

4515

Model Number

Design Highlights

- High-friction material for enhanced braking efficiency
- Robust construction for extended service life
- Precision-engineered slots and chamfers
- Heat-resistant friction material
- Reduced noise and vibration design

Application Suitability

Heavy-duty braking, Demanding road conditions, Reliable stopping power
