

# Brass Angle Radiator Valve

This angle radiator valve is constructed from durable brass. It is designed for controlling the flow of water in radiator systems.

## Overview

### Professional Grade Radiator Control

This durable brass angle radiator valve is engineered for reliable flow control in heating systems. Featuring a high-quality chrome-plated finish and a robust brass body, it ensures long-term resistance to corrosion and wear. Designed for water-based applications, this valve provides precise regulation for individual room temperature management.

## Technical Specifications

### Maximum Pressure

**10 bar**

Max Pressure

### Available Sizes

- 1/2" \* 3/8"
- 1/2" \* 1/2"

### Operating Temperature

-10°C minimum

### Pipe Thread Standard

ISO-228-1:2000

## Materials and Construction

### Surface Finish

Chrome Plated • Polished

### Body Material

Brass

### Handle Material

Zinc (Brass)

### Valve Core

Brass

## Usage

### Suitable Medium

Water
