

Brass Angle Valve for Plumbing Systems

This angle valve is constructed from durable brass. It is designed for precise flow control and corrosion resistance in plumbing and industrial systems.

Product Overview

Professional Plumbing Solutions

This brass angle valve is engineered for reliable water flow regulation in both residential and commercial plumbing systems. Constructed with a durable brass body featuring a polished chrome-plated finish, it offers excellent corrosion resistance and longevity. The valve includes a zinc-brass handle for smooth operation and features a robust brass core for consistent performance under pressure.
