

# Brass Angle Valve

This valve is designed to control the flow of liquids or gases at a 90-degree angle. It is constructed from durable brass material for longevity and resistance to corrosion.

## Overview

### Professional Grade Brass Angle Valve

This durable brass angle valve is designed for reliable flow control in plumbing systems. Constructed from high-quality Hpb57-3 brass, it offers excellent corrosion resistance and longevity. Its standard G1/2" sizing ensures easy integration into existing setups, making it an ideal choice for professional plumbing applications.
