

Brass Ball Pein Hammer

This ball pein hammer features a brass head for striking softer metals. It is designed for shaping metal and rounding edges.

Product Overview

Products Description

Professional Brass Ball Pein Hammer

This brass ball pein hammer is a specialized safety tool designed for metalworking in environments where non-sparking properties are essential. Featuring a high-quality brass head and a precision casting process, it allows for shaping and forming metal without damaging the workpiece or creating hazardous sparks. The dual-head design includes a flat face for general striking and a rounded ball pein for riveting and contouring.

Key Features

- Non-sparking brass material for safety
- Precision casting processing for durability
- Dual-purpose head (Flat and Ball Pein)
- Ergonomic shock-absorbing handle
- Non-marring surface protection

Technical Specifications

TKOKAEX 拓开 Non sparking tools

Available Model Range

Model Number	Weight (lb)	Length (mm)
TK2105-02	1/2	280
TK2105-04	3/4	300
TK2105-06	1	310
TK2105-08	1.5	340
TK2105-10	2	350
TK2105-12	2.5	360

Head Material

Brass / Copper

Safety Properties

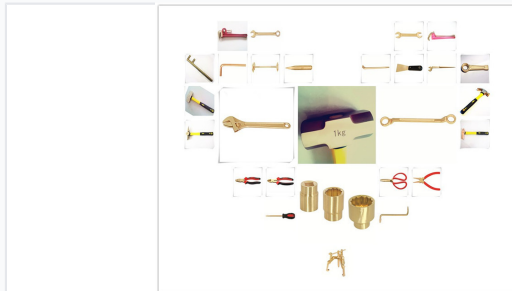

Non-Sparking, Explosion-Proof, Safety Tool

Quality & Compliance

Quality Standards

ISO 9001:2008 • CMDC Certified • Explosion-Proof Qualified

Application

Common Applications

- Oil and Gas industries
- Chemical processing plants
- Mining operations
- Metal shaping and riveting
- Striking punches and chisels
