## Product Overview

### Professional Grade Brass Ball Valve

This durable brass ball valve is designed for reliable flow control in various plumbing and industrial applications. Featuring a full bore design for unrestricted fluid movement and a sturdy aluminum butterfly handle for easy operation, it ensures long-lasting performance. This component is an essential element for systems requiring precise shut-off capabilities.

## Technical Specifications

### Bore Type

Full Bore

### Valve Type

Brass Ball Valve

### Handle Material

Aluminum

### Handle Style

Butterfly Handle
