

Brass Ball Valve with Red Handle

This brass ball valve is designed for HVAC&R applications, providing reliable flow control. It features threaded connections for easy installation in piping systems and a red handle for manual operation.

Overview

Reliable Flow Control Solution

The JL-7542 is a high-quality brass ball valve engineered for precise fluid control in HVAC&R and plumbing systems. Featuring a durable brass body and a manual red handle, it offers excellent corrosion resistance and ease of operation. This valve is designed for quick installation and long-term reliability in demanding professional environments.
