

Brass Bibcock with Cross Handle

This bibcock is designed for reliable water flow control. It is constructed from durable brass and features a threaded inlet and cross-handle.

Product Overview

Reliable Water Flow Control

This brass bibcock is engineered for durability and precise water flow management in outdoor and utility environments. Featuring a high-quality brass construction and a traditional cross-handle design, it ensures dependable operation and a secure shut-off. The threaded inlet and curved spout provide a professional-grade solution for efficient water delivery.
