

Brass Check Valve with Strainer

This brass check valve allows flow in one direction only, preventing backflow. The integrated strainer helps filter out debris, protecting the valve and downstream components.

Product Overview

Reliable Backflow Prevention

The JL-4110 Brass Check Valve with Strainer is engineered to ensure unidirectional flow and prevent backflow in plumbing and HVAC systems. It features an integrated strainer that effectively filters out debris, protecting downstream components from damage. This robust brass valve is suitable for a wide range of industrial and residential applications where system integrity is paramount.

Key Features

Main Features

- One-way flow control
- Integrated debris filtration
- Durable brass construction
- Suitable for plumbing and HVAC systems

Technical Specifications

Art No.	Size		
JL-4110	1/2	3/4	1
	1 1/4	1 1/2	2
	2 1/2	3	4

Comprehensive size range for various piping requirements.

Size Range Details

Art No.	Size (Inches)
JL-4110	1/2
JL-4110	3/4
JL-4110	1
JL-4110	1 1/4
JL-4110	1 1/2
JL-4110	2
JL-4110	2 1/2
JL-4110	3
JL-4110	4

Model Number

JL-4110

Available Sizes

1/2", 3/4", 1", 1 1/4", 1 1/2", 2", 2 1/2", 3", 4"

Material & Design

Body Material

Brass

Component Type

Check Valve with Strainer
