

Brass Fitting with Hex Nut and Slotted Base

This precision-engineered brass fitting is designed for robust connections in plumbing and industrial applications. It features a hexagonal nut for secure tightening and a slotted base for easy installation and alignment.

Product Overview

Precision Engineered Brass Fitting

This precision-engineered brass fitting is designed for robust and reliable connections in plumbing and industrial applications. Featuring a hexagonal nut for secure tightening and a specialized base with integrated slots, it ensures easy installation and precise alignment. Constructed from high-quality brass, it offers excellent corrosion resistance and durability for long-lasting performance in demanding environments.

Technical Specifications

Material	High-quality Brass
Key Design Features	Hexagonal Nut, Slotted Base, Corrosion Resistant

Application & Compatibility

Suitable Media

- Water
- Gas
- Air

Common Applications

- Pipe connections
- Valve installations
- Equipment assembly

Performance

Performance Benefits

Leak-proof seal • Consistent flow • Durable construction
