Product Overview

Precision Gas Control

This professional-grade brass gas control valve is engineered for reliable flow regulation in various gas appliance applications. Designed to meet international standards, it offers robust performance for LPG systems. The valve features a durable brass construction with precise control mechanisms for safe and efficient operation.

Technical Specifications

Rated Pressure

65 mbar

Pressure Rating

Origin/Standard

TURKEY

Material

Brass

Application & Compatibility

Supported Valve Types

- Needle valve
- Cylinder valve
- Gas stove control valve

Fuel Compatibility

LPG

Design Features

Key Features

- Threaded inlet for secure connection
- Mounting bracket for stability
- Control stem for precise regulation
- Blue control knob for easy operation
