

Brass Gas Pressure Regulator with Dual Gauges

This brass gas pressure regulator reduces and controls gas pressure in diverse applications. Dual gauges monitor inlet and outlet pressure for precise adjustments and safe performance.

Product Overview

Professional Gas Pressure Regulation

This economic light-duty gas pressure regulator is designed for precise control in industrial and commercial applications. Featuring a robust brass construction, it includes dual high-accuracy gauges for monitoring both inlet and outlet pressure. It is compatible with a variety of gases including Oxygen, Acetylene, Propane, and Argon, ensuring versatile performance for welding and cutting tasks.

Performance Data

Model Specifications

Model	Gas Type	Max Inlet Pressure (MPa)	Working Pressure (MPa)	Rated Flow (m ³ /h)
OR-X57B	Oxygen	15	1.25	40
AR-X57B	Acetylene	2.5	0.15	5
LR-X57B	Propane	2.5	0.4	5
ArR-X57B	Argon	15	0.75	0

Pressure Gauge Ranges

25 MPa

Oxygen High Pressure Gauge

40 l/min

Argon Low Pressure Gauge

Connectivity

Connector Specifications

- Inlet Connector: G3/4 Female or W21.8x1/14LH
- Outlet Connector: M16x1.5 RH or M16x1.5 LH

Logistics

Packaging Details

20 PCS per Carton, Carton Dimensions: 440x295x265 mm
