

Brass Gate Valve 0.25-4

This brass gate valve is designed for controlling fluid flow in various applications. It features threaded connections and a handwheel for manual operation.

Product Overview

Industrial Brass Gate Valve

This durable brass gate valve is engineered for precise fluid flow control in a wide range of industrial and residential piping systems. Featuring a robust construction and reliable manual operation via a handwheel, it is suitable for water, oil, and gas applications. The design includes threaded connections to ensure straightforward installation and dependable shut-off performance.

Technical Specifications

Standard Compliance

GB Standard

Valve Type	Brass Gate Valve
Size Range	0.25 - 4 inches
Material	Brass

Applications

Compatible Media	Water, Oil, Gas
