

Brass Gate Valve for Fluid Control

This gate valve is constructed from durable brass, offering resistance to corrosion and ensuring a long service life. It is designed to regulate the flow of water, oil, and gas in various applications.

Product Overview

Professional Fluid Control Solution

This brass gate valve is engineered for precise fluid flow control across diverse industrial and plumbing environments. Constructed from high-quality, durable brass, it offers excellent corrosion resistance and long-term reliability. The unit features a manual handwheel for intuitive operation and a threaded connection design that ensures straightforward, efficient installation.

Technical Specifications

Body Material	Brass
Connection Type	Threaded
Operation	Manual Handwheel
Model Identifier	Jx9601
Size	1/2 inch
Pressure Rating	200 PSI

Applications

Suitable Sectors

Industrial • Plumbing

Compatible Media	Water, Oil, Gas
