

Brass Hammer with Fiberglass Handle

This brass hammer is designed with a plastic-coated fiberglass handle. The brass head provides a softer impact compared to steel, which is ideal for applications where minimizing surface damage is crucial.

Product Overview

Professional Non-Sparking Brass Hammer

This brass hammer is engineered for precision tasks where surface protection is paramount. The brass head delivers a softer impact compared to traditional steel tools, effectively preventing damage to delicate workpieces. Designed with a durable fiberglass handle and a specialized plastic coating, it offers superior grip and vibration reduction for extended professional use.

Technical Details

Head Material	Brass
Handle Material	Fiberglass with plastic coating

Key Features

Best For

- Delicate surface work
- Precision assembly
- Applications requiring reduced impact force

Core Benefits	Non-damaging impact, Vibration reduction, Ergonomic grip, High durability
