

Brass Hose Adapter Fitting

This brass hose adapter fitting connects different sized hoses. It is made from durable brass and ensures a secure, leak-proof connection for plumbing and industrial use.

Product Overview

Precision Brass Hose Adapter

This durable brass hose adapter is engineered for reliable connectivity in both plumbing and industrial environments. Featuring a precision-machined stepped design and a convenient hexagonal nut, it facilitates secure, leak-proof connections between varying hose diameters. Its corrosion-resistant construction makes it an ideal solution for systems handling water, air, and other fluid media.

Technical Specifications

Key Features

- Stepped design for multi-diameter compatibility
- Hexagonal nut for easy manual tightening
- Precision-machined threading
- Corrosion-resistant construction

Material	Brass
Compatible Media	Water, Air, General Fluids

Application

Suitable Applications

Plumbing Systems • Industrial Piping • Hose Interfacing
