

# Brass Hose Adapter with Male and Female Threaded Ends

This brass hose adapter is designed for connecting hoses with different thread types or sizes. It features both a female threaded end for attaching to a male connection and a male threaded end for connecting to a female connection.

## Overview

### Versatile Brass Hose Adapter

This durable brass hose adapter is engineered to facilitate seamless connections between hoses with varying thread types or sizes. Designed for reliability, the unit features both male and female threaded ends, ensuring compatibility across a wide range of plumbing and irrigation setups. Its robust brass construction offers excellent corrosion resistance, while the included rubber O-ring guarantees a secure, watertight seal for long-lasting performance.

## Technical Specifications

Material	Brass
Connection Types	Male Threaded, Female Threaded
Sealing Mechanism	Rubber O-ring

## Applications

### Typical Applications

- Plumbing Systems
- Irrigation Systems
- Hose Thread Adaptation

## Features

### Key Benefits

Corrosion Resistant • Watertight Seal • Durable Construction
