Overview

Professional HVAC&R Drainage Solution

This brass drain cock is engineered for high-performance fluid management in HVAC&R systems. Featuring a durable brass construction for superior corrosion resistance, it includes a barbed outlet for secure hose connections and a threaded inlet for stable installation. It provides controlled drainage to prevent equipment damage and maintain peak system performance while minimizing spills and waste.

Technical Specifications

Specification

0.5 inch

Inlet Thread

15 mm

Outlet Size

Product Code

Y00559

Identification Markings

86, 2870-22

Design & Materials

Connection Types

- Threaded Inlet
- Barbed Hose Outlet

Key Features

Corrosion Resistant • Controlled Drainage • HVAC&R Compatible

Body Material

Durable Brass

Manufacturing & Quality

Manufacturing Standards

- Green manufacturing processes
- Large-scale production capacity
- Guaranteed quality and cost efficiency
- One-stop solution provider

Applications

| | |
|-----------------------------|---|
| Primary Application | Draining fluids from HVAC&R equipment |
| System Compatibility | HVAC&R Systems, Valve Systems, Plumbing & Heating |
