

Brass Reducing Adapter for Pipe Connection

This brass reducing adapter is designed for connecting pipes of different sizes. It features male threads on one end and female threads on the other, allowing for a secure and leak-proof connection.

Product Overview

Professional Grade Brass Reducing Adapter

This brass reducing adapter is engineered for reliable pipe size transitions in plumbing and industrial piping systems. Constructed from durable, high-quality brass, it provides exceptional corrosion resistance for long-term performance. The design features a hexagonal body for easy installation and secure tightening with standard tools, ensuring a leak-proof connection between male and female threaded ends.

Technical Specifications

Material	Brass
Connection Ends	Male Thread, Female Thread
Body Shape	Hexagonal

Application

Suitable Applications

- Plumbing systems
- Industrial piping
- Pipe size reduction
