

Brass Shim Stock Roll

Precision brass shim stock roll is ideal for shimming, spacing, and alignment applications. This brass roll provides excellent corrosion resistance and dimensional stability.

Product Overview

Precision Brass Shim Stock

This high-quality brass shim stock roll is designed for precision shimming, spacing, and alignment applications. It offers excellent corrosion resistance and superior dimensional stability, making it a reliable choice for demanding industrial environments. The convenient roll format allows for easy dispensing and cutting to exact lengths, ensuring efficiency in machinery maintenance, tool and die work, and prototype development.

Material Properties

Material	Brass
Form	Roll

Applications

Common Applications	Machinery Maintenance, Tool and Die Work, Prototype Development, Alignment, Spacing
---------------------	---

Key Features

Performance Attributes

Corrosion Resistant • Dimensionally Stable • Easy to Cut • Precision Grade
