

Brass Stop Valve with Compression Fittings

This stop valve is designed for controlling the flow of fluids in plumbing systems. It features a brass body for durability and corrosion resistance, and a green handle for easy operation.

Product Overview

Professional Flow Control

This stop valve is engineered for precise fluid flow management in professional plumbing systems. Constructed from high-quality brass, it offers exceptional durability and robust resistance against corrosion. Designed for ease of use, the valve includes a highly visible green handle and utilizes reliable compression fittings to ensure secure, leak-proof connections in various piping environments.

Technical Specifications

Key Features

- Corrosion resistant brass construction
- Leak-proof compression fitting design
- Easy-grip green handle

Body Material	Brass
Connection Type	Compression Fittings
