

Brass Swing Check Valve

This brass swing check valve allows flow in only one direction, preventing backflow. It is constructed from durable brass, offering corrosion resistance and longevity.

Product Overview

Reliable Flow Control

This brass swing check valve is engineered to ensure unidirectional flow, effectively preventing backflow in your piping systems. Constructed from durable, corrosion-resistant brass, it provides long-lasting performance in demanding environments. The swing mechanism operates automatically, opening with forward flow and closing securely when flow stops or reverses, making it an essential component for protecting equipment in plumbing, heating, and irrigation applications.

Technical Specifications

Manufacturing Standard

GB Standard

Material	Brass
Size Range	0.5 - 2 inch
Valve Type	Swing Check Valve

Applications

Suitable Applications	Plumbing, Heating Systems, Irrigation
