

Brass Water Bibcock

This brass bibcock is designed for reliable water flow control. It features durable brass construction, ensuring longevity and resistance to corrosion.

Product Overview

Reliable Brass Water Control

This high-quality brass bibcock is engineered for durable performance in both residential and commercial plumbing environments. Its corrosion-resistant construction ensures a long service life, while the smooth-operating handle allows for precise water flow adjustment. Designed for versatility, it is an ideal solution for outdoor faucets, garden taps, and various water control applications.

Technical Specifications

Art No.	Size	
JL-7311B	1/2	3/4

The JL-7311B model is available in standard 1/2 and 3/4 inch sizes to meet diverse plumbing requirements.

Construction Material

Brass

Model Number	JL-7311B
Available Sizes	1/2", 3/4"
Connection Type	Threaded Inlet and Outlet

Performance & Features

Key Features

- Corrosion-resistant brass body
- Smooth-operating handle for flow adjustment
- Leak-free secure connection
- Easy installation with threaded ends

Applications

Suitable Applications

- Outdoor faucets
- Garden taps
- Residential plumbing
- Commercial water systems
