Product Overview

Professional Marble Cutting Solution

This brazed diamond blade is engineered for the precision trimming, chamfering, and dimension processing of various marble slabs. Featuring a unique fan-type segment design and narrow slot brazing, it significantly minimizes cutting vibration while ensuring high sharpness and efficiency. Designed for wet cutting applications, this blade delivers a smooth finish without chipping or breaking delicate stone materials.

Technical Specifications

Blade Diameter	450 mm
Arbor Hole	60 mm
Cutting Method	Wet cutting

Performance Features

Key Advantages

- Smooth cutting finish
- Extended service life
- Stable processing quality
- Reduced vibration via fan-type segments

Performance Highlights

1 High

Chip-free Performance

1 High

Efficiency

Configuration Options	Silent, Non-silent
