

Brazed Diamond Cutting Blade

This cutting blade is designed with a brazed diamond edge for cutting through hard materials. It features a central mounting hole and bolt holes for secure attachment in demanding applications.

Product Overview

High-Performance Cutting Solution

This brazed diamond cutting blade is engineered specifically for demanding cutting tasks involving hard materials. It features a robust diamond-coated edge that ensures both efficiency and high precision during operation. Designed for reliability, the blade includes a secure mounting system with a central hole and four auxiliary bolt holes for stable attachment in various industrial cutting applications.

Technical Specifications

Mounting Configuration

- Central mounting hole
- Four surrounding bolt holes

Blade Technology	Brazed Diamond
Material Suitability	Hard Materials, Industrial Cutting
