

Brazed Diamond Cutting Blade

This brazed diamond cutting blade is designed for efficient and precise cutting of hard materials. The blade features a durable steel core with a brazed diamond edge, offering exceptional wear resistance and an extended lifespan.

Product Overview

High-Performance Brazed Diamond Blade

This brazed diamond cutting blade, model FLB017, is engineered for efficient and precise cutting of hard materials. Featuring a durable steel core with a high-concentration brazed diamond edge, it offers exceptional wear resistance and an extended operational lifespan. Its segmented rim design facilitates optimal debris removal and cooling, making it suitable for both wet and dry cutting applications.

Technical Specifications

Operation Modes

Wet Cutting • Dry Cutting

Model Number	FLB017
Suitable Materials	Granite, Marble, Ceramic Tile, Concrete

Design Features

Key Design Features

- Segmented rim for debris removal
- High diamond concentration
- Precision balanced for smooth operation
- Reinforced center for stability

Compatibility

Compatible Tools

- Angle Grinders
- Circular Saws
