

Brazed Diamond Grinding Wheel

This brazed diamond grinding wheel is designed for aggressive material removal and shaping. It features a durable steel core with a brazed diamond matrix for long-lasting performance.

Product Overview

High-Performance Brazed Diamond Grinding Wheel

This brazed diamond grinding wheel is engineered for aggressive material removal and precision shaping. Featuring a robust steel core with a specialized brazed diamond matrix, it delivers consistent cutting action and minimizes heat buildup during operation. It is highly versatile, supporting both wet and dry applications on hard materials like stone and concrete.

Technical Specifications

Usage Modes

Wet Application • Dry Application

Construction

- Brazed diamond matrix
- Durable steel core
- Standard arbor size compatibility

Suitable Materials

Stone, Concrete, Hard Materials

Performance Metrics

Performance Highlights

1 Efficiency

Aggressive Material Removal

1 Technology

Heat Minimization
