

Brazed Diamond Grinding Wheel

This brazed diamond grinding wheel is designed for aggressive material removal and surface preparation. Featuring a durable steel body with a brazed diamond matrix, it offers exceptional wear resistance and long life.

Product Overview

High-Performance Brazed Diamond Grinding Wheel

This brazed diamond grinding wheel is engineered for aggressive material removal and precise surface preparation. Constructed with a durable steel body and a robust brazed diamond matrix, it delivers exceptional wear resistance and an extended service life. Designed for versatility, it is an ideal solution for grinding concrete, stone, and other hard materials, ensuring a consistent and smooth finish.

Technical Specifications

Key Features

- Brazed diamond matrix for high wear resistance
- Durable steel body construction
- Even diamond grit distribution
- Optimized for efficient dust extraction
- Reduced vibration design

Material Compatibility

Concrete, Stone, Hard Materials

Mounting System

Central mounting plate with multiple bolt holes
