

Brazed Diamond Hole Saw for Tile and Stone

Brazed diamond hole saws are designed for drilling clean, precise holes in hard materials such as ceramic, tile, and stone. The durable steel body features a brazed diamond cutting edge for efficient material removal and extended tool life.

Product Overview

Professional Grade Diamond Hole Saw

Engineered for precision and durability, this brazed diamond hole saw is the ideal solution for cutting through exceptionally hard materials. Its robust steel body combined with a high-performance brazed diamond cutting edge ensures efficient material removal and an extended tool lifespan. Designed for compatibility with standard drills and electric power tools, it provides professional-grade results for tile, stone, and glass applications.

Technical Specifications

Tool Compatibility

- Standard Drills
- Electric Power Tools

Key Construction Features

Brazed Diamond Edge • Durable Steel Body • High-Efficiency Cutting

Compatible Materials

Ceramic, Porcelain, Granite, Marble, Glass, Tile
