

Brick Hammer with Fiberglass Handle and Rubber Grip

This brick hammer is designed with a fiberglass handle and rubber grip. The hardened steel head allows for efficient breaking and shaping of bricks and masonry materials.

Product Overview

Professional Masonry Tool

This brick hammer is engineered for durability and precision in masonry and construction environments. Featuring a hardened steel head, it is optimized for the efficient breaking and shaping of bricks and masonry materials. The fiberglass handle construction offers superior strength while effectively dampening vibration, paired with a rubberized grip to ensure user comfort and secure handling during extended work sessions.

Technical Specifications

Head Material	Hardened Steel
Handle Material	Fiberglass
Grip Material	Rubber

Key Features

Design Advantages

- Vibration reduction for reduced fatigue
- Hardened steel head for masonry shaping
- Ergonomic rubber grip for secure handling
- High-strength fiberglass handle

Ideal Applications	Bricklaying, Masonry, Construction, Demolition
