

# Bricklayer's Hammer with Chisel Blade

This brick hammer is designed for cutting and shaping bricks and masonry materials. It features a square face for striking and a chisel-like blade for splitting bricks.

## Product Overview

### Professional Masonry Tool

This bricklayer's hammer is a specialized hand tool engineered for precision in cutting, shaping, and setting masonry materials. Featuring a robust forged hardened steel head, it is built to endure the rigors of repeated impact on construction sites. The design incorporates a square striking face paired with a chisel-like blade, providing versatility for both scoring and splitting bricks effectively.

## Design & Construction

Head Material	Forged Hardened Steel
Handle Material	Steel or Fiberglass
Grip Type	Rubberized

## Key Features

Key Features	Chisel Blade, Square Striking Face, Shock Absorption, Hardened Steel Head
--------------	---

## Usage

### Suitable For

- Professional Bricklayers
- Masonry Contractors
- DIY Masonry Projects
