

Bricklaying Mortar Knife with Wooden Handle

This bricklaying knife is a hand tool for bricklaying and masonry. It features a flat, triangular blade made of hardened steel for precise cutting of mortar and a wooden handle for a comfortable grip.

Product Overview

Professional Masonry Tool

This bricklaying knife is a hand tool specifically engineered for masonry and bricklaying applications. Featuring a durable hardened steel blade with a precise triangular shape, it is designed for shaping mortar joints and removing excess material. The ergonomic wooden handle ensures comfort during extended use, making it an essential tool for detailed masonry tasks.

Technical Specifications
