

British-Style Cutting Torch

This British-style cutting torch is engineered for precision cutting operations. Its ergonomic design ensures comfortable handling, while its control valves allow precise gas flow adjustment.

Product Overview

Professional British-Style Cutting Torch

This British-style cutting torch is engineered for both lightweight and heavy-duty industrial applications. Designed in strict conformity with EN ISO 5172 standards, it features a forged aluminum handle and stainless steel tubes for superior strength, safety, and durability. The unit offers precise flame adjustment through high-quality stainless steel valves, making it an ideal tool for cutting steel and other metals with accuracy and efficiency.
