

Bronze Quick Closing Valve for Marine Applications

This quick closing valve is designed for marine applications. Its spring-loaded mechanism allows for rapid shut-off.

Product Overview

Marine Quick Closing Valve

This bronze quick closing valve is engineered specifically for demanding marine environments, offering robust performance and reliability. Designed to meet JIS standards, it features a durable construction that resists corrosion and ensures efficient flow control. With a specialized quick-shutoff mechanism, this valve is an essential safety component for various shipboard fluid systems.

Materials & Construction

Body Material	BC6 Bronze
Bonnet Material	BC6 Bronze
Disc Material	BC6 Bronze
Valve Seat Material	BC6 Bronze
Stem Material	C3771BA or BE
Operating Spindle Material	SUS403
Gasket Material	Non-asbestos
Handwheel Material	FC200

Standards & Compliance

Compliance	JIS Marine Standard, Marine Grade
