

Bronze Threaded Ferrule Valve

This bronze ferrule valve is designed for reliable shutoff performance in plumbing and industrial systems. Its robust bronze construction ensures durability and corrosion resistance.

Product Overview

High-Performance Bronze Ferrule Valve

This threaded ferrule valve is engineered for durability and reliable flow control in demanding plumbing and industrial piping systems. Constructed from high-quality BS1400 LG2 bronze, it offers excellent corrosion resistance and long-term performance. The design features standard G and R threaded connections, ensuring compatibility with a wide range of existing infrastructure.

Technical Specifications

Max Pressure

21 Bar

Pressure Rating

Available Sizes

- 1/2"
- 3/4"
- 1"

Material	BS1400 LG2 Bronze
Sealing Standard	BS2494 Rubber

Connection Details

Inlet Connection	G Thread
Outlet Connection	R Thread

Identification

Product Code	SV-FE0101
