

Brush Cutter Flexible Shaft

This flexible shaft is designed for brush cutters. It ensures efficient power transmission from the engine to the cutting head for smooth operation.

Product Overview

High-Performance Flexible Shaft

This flexible shaft is engineered specifically for brush cutters, utilizing 70#~75# high-carbon steel wire to ensure superior elasticity and wear resistance. Designed for efficient power transmission, it features precision-crimped ends that minimize vibration during operation. Its robust construction makes it an ideal component for demanding agricultural and landscaping machinery.

Technical Specifications

Available Diameters

- 6mm
- 8mm
- 9mm

Material	70#~75# High-Carbon Steel Wire
Direction of Twist	Levorotation
End Configuration	Square, Non-square

Performance Features

Performance Highlights

75 Grade

Carbon Steel Grade

Operational Benefits

Wear Resistant • Low Vibration • Highly Elastic • Precision Engineered
