

# Brushless AC Alternator

This industrial-grade brushless alternator is designed for power generation applications. It features a robust construction and efficient cooling system for reliable performance.

## Product Overview

### Industrial-Grade Power Generation

This brushless AC alternator is engineered for robust performance in demanding industrial environments. Designed with an optimized winding configuration and an efficient cooling system, it ensures reliable power output for continuous operation. The unit is built with durable materials, meeting high safety and performance standards for professional power generation applications.

## Technical Specifications

### Available Series

- ST/STC Series (Brush)
- Stamford Series (Brushless)

<b>Brushless Series Power Output</b>	2000 kW
<b>Brush Series Power Output</b>	50 kW
<b>Compatible Engine Brands</b>	Cummins, Perkins, Deutz, Mitsubishi, MTU, Weichai, Yuchai
