

Brushless DC Motor 110V 1200 RPM

This brushless DC motor is designed for various applications. It operates at DC 110V with a rotational speed of 1200 RPM.

Overview

High-Efficiency Brushless DC Motor

This brushless DC motor is engineered for reliable performance in demanding machinery applications. Operating at a steady 110V DC, it provides a consistent rotational speed of 1200 RPM, making it an ideal component for precision-driven equipment. Its robust construction ensures long-term operational efficiency for industrial use.

Technical Specifications

Operating Voltage	110 V
Rotational Speed	1200 RPM
Motor Type	Brushless DC Motor
Model Number	ZW90C-4/C01

Certification & Compliance

Quality Standards	QC Passed
-------------------	-----------

Performance Metrics

Performance Summary

110 V Voltage	1200 RPM Speed
