Overview

High-Efficiency Kitchen Appliance Motor

This Brushless DC (BLDC) motor is engineered specifically for reliable performance in household kitchen appliances. Featuring a robust metallic housing and an integrated cooling fan, it is designed to manage thermal loads efficiently during operation. The unit includes a versatile grooved output shaft and a multi-pin electrical connector, ensuring seamless integration into various appliance designs.

Technical Specifications

Motor Technology	Brushless DC (BLDC)
Rated Value	1.8 N/A

Design & Construction

Housing Material	Metallic
Output Shaft	Grooved
Cooling System	Yes
Mounting Features	White plastic support bracket, Multi-pin connector
