Product Overview

Professional Dual Action Polisher

This brushless dual action polisher is engineered for professional detailing, featuring high-grade 20CRMNT1 core components with integrated shaft and teeth. Designed for durability and precision, the unit incorporates CNC-machined gearboxes and advanced heat dissipation systems. It offers versatile performance with multiple eccentricity options and adjustable speed settings to ensure a professional finish on various automotive surfaces.

Technical Specifications

Available Eccentricity

- 8
- 12
- 15
- 21

Rated Input Power	780 W
No-Load Speed	2000-4800 /min
Disc Size	125 mm
Voltage Compatibility	110V/60Hz, 230V/50Hz

Key Features

Performance Highlights

15 mm

Standard Eccentricity

125 mm

Disc Diameter

Construction & Design

Brushless Motor • CNC Gear Case • Soft Start • Fish Scale Antiskid Rubber

Maintenance & Control

Feature	Benefit
Variable Speed Dial	Infinitely adjustable control
Replaceable Brushes	Ease of maintenance
D Handle	Multi-position handling
