

BT Interface CNC Machine Tool Holder

This high-precision tool holder is designed for CNC machining centers. It features a BT30 interface for secure and accurate tool clamping, providing rigidity and stability for enhanced performance and extended tool life.

Overview

High-Precision CNC Tooling

This BT-interface tool holder is engineered for demanding CNC machining environments, offering superior rigidity and stability. Constructed from high-quality 20CRMO material, it undergoes vacuum carburizing and quenching to ensure long-lasting durability and consistent performance. Designed to enhance tool life and machining accuracy, it is a versatile solution for professional machining centers.

Technical Specifications

Material	20CRMO
Heat Treatment	Vacuum carburizing and quenching
Supported Models	BT-ER, BT-C, BT-APU, BT-SK

Purchase Information

Wholesale Available	Yes
