

BT40 Plate Funnel Tool Changer

This BT40 plate funnel tool changer is designed for efficient tool changes in CNC machining centers. The funnel-shaped design ensures smooth tool insertion and removal, maximizing productivity.

Product Overview

BT40 Plate Funnel Tool Changer

This BT40 plate funnel-shaped operated tool changer is precision-engineered for efficient and reliable tool changes within CNC machining centers. Its robust construction ensures long-term durability and consistent performance in demanding industrial environments. The specialized funnel-shaped design facilitates smooth tool insertion and removal, significantly minimizing downtime and maximizing overall machining productivity.

Technical Specifications

Tool Interface	BT40
Design Features	Funnel-shape, Robust Construction, High-Speed Compatible

Performance Metrics

Performance Highlights

1 High

Tool Change Efficiency

1 Optimized

Downtime Reduction

Compatibility

Compatible Tool Holders

- BT40 Tool Holders

Application

Recommended Applications

CNC Machining Centers • High-Speed Machining • Frequent Tool Change Cycles
