

Buffering Cabinet Hinge

This buffering hinge is designed for use in cabinets. It features a stainless steel construction with a nickel-plated finish.

Product Overview

Professional Buffering Cabinet Hinge

This high-quality hydraulic buffering hinge is engineered for durability and silent operation in cabinet applications. Constructed from premium stainless steel with a nickel-plated finish, it ensures long-lasting performance and corrosion resistance. Designed for precision, this hinge supports various door thicknesses and features a 95-degree opening angle, making it an ideal choice for reliable furniture hardware.

Technical Specifications

Cup Distance Options

- 45
- 48
- 52

Material & Finish	Stainless Steel, Nickel Plated
Opening Angle	95 degree
Hinge Cup Diameter	35 mm
Compatible Door Thickness	14-21mm
Door C Distance	3-7mm

Performance Metrics

Durability Test

100000 cycles

Open & Close Cycles

Key Features

Hydraulic Buffering • Silent Operation • Corrosion Resistant • No Oil Spill

Commercial Terms

Minimum Order Quantity	5000 pcs
Delivery Time	7-15 days
Samples	Yes

Configuration Options

Available Overlays	Full Overlay, Half Overlay, Insert
