

Built-In Dual Burner Gas Cooktop

This built-in cooktop features two gas burners with stainless steel grates. It has a black glass surface and control knobs for adjusting flame intensity.

Overview

Modern Dual-Burner Performance

This built-in gas cooktop features a sleek black glass surface designed for contemporary kitchen aesthetics. Equipped with two high-efficiency square burners and durable stainless steel grates, it offers both reliability and a modern look. The intuitive control knobs provide precise adjustment of flame intensity, making it an ideal solution for compact professional or residential cooking environments.
