

# Bulk Cement Transport Truck

This bulk cement transport truck is engineered for the efficient and safe transport of cement and other powdered materials. The truck features a high-capacity tank and pneumatic discharge system for optimal operation.

## ADDITIONAL IMAGES

## Vehicle Overview

### Robust Bulk Transport Solution

This 8x4 bulk cement transport truck is engineered for high-efficiency logistics in construction and industrial applications. It features a heavy-duty chassis and a large-capacity pneumatic tank system designed to minimize material loss during transit. With a powerful 420hp engine and advanced suspension, this vehicle ensures reliability and stability even under demanding operating conditions.

Drive Type	8x4
Dimensions (L x W x H)	11980 x 2550 x 3800 mm
Kerb Weight	19000 kg
Gross Vehicle Weight	38500 kg

## Tank & Capacity

Tank Capacity	50 m <sup>3</sup>
Tank Dimensions	9300 x 2400 x 2400 mm

## Engine & Performance

### Engine Performance

**420 hp**  
Power

**1930 N.m**  
Max Torque

**11.81 L**  
Displacement

### Emission Standard

Euro II

## Transmission & Drivetrain

Transmission	9-speed manual with servo and synchronizer
Clutch	Single-plate dry diaphragm spring, 430mm

## Cab & Comfort

### Cab Amenities

- Single berth with curtain
- Hydraulically damped adjustable driver's seat
- Power windows
- Stereo radio and MP3 player
- Air conditioning
- 4-point floating suspension
