

Bulldozer Cutting Edge 1U0293

This cutting edge is engineered for optimal performance and extended lifespan in demanding construction environments. It is ideal for bulldozers and other earthmoving equipment, enhancing productivity and reducing downtime.

Overview

High-Performance Bulldozer Cutting Edge

The 1U0293 cutting edge is engineered for optimal performance and extended lifespan in demanding construction environments. Designed for bulldozers and earthmoving equipment, it ensures efficient material penetration and superior wear resistance. This robust component enhances productivity while reducing downtime in heavy-duty applications.

Technical Specifications

Key Performance Metrics

1 1U

Model Series

Part Number

1U0293

Material & Construction

Build Quality

- Precision-engineered for efficient operation
- Hardened steel for impact resistance
- Superior wear resistance for extended life
- Robust construction for heavy-duty use

Available Materials

Boron Steel (30MnB), Manganese Steel (16Mn), Hardened Steel

Application

Compatible Machinery

Bulldozers • Graders • Earthmoving Equipment • Construction Machinery

Operating Environment

Demanding construction and leveling environments

Logistics & Customization

Customization Options

- Multiple color options available
- Various specifications to choose from
- Custom material selection

Standard Packaging

Supplied in strapped bundles for easy handling and storage
