

Bus Brake Lining

This brake lining is designed for use in new HYUNDAI buses, specifically models XML705 and XML706. It conforms to precise specifications, including dimensions of 200x219x11.4/17.6 and 205x219x16.7/18.5, and incorporates 26 holes.

Product Overview

Heavy-Duty Bus Brake Lining

This high-performance brake lining is engineered specifically for rear bus braking systems. Designed for durability and precise fitment, it features a robust construction with 26 mounting holes to ensure secure installation. The lining is supplied in standard bulk packaging of 16 units per box, making it an efficient choice for fleet maintenance and repair operations.
